# CHIS Data

Products, Opportunities, and How to Use CHIS Data in Your Work

February 10, 2021

# California Health Interview Survey (CHIS)

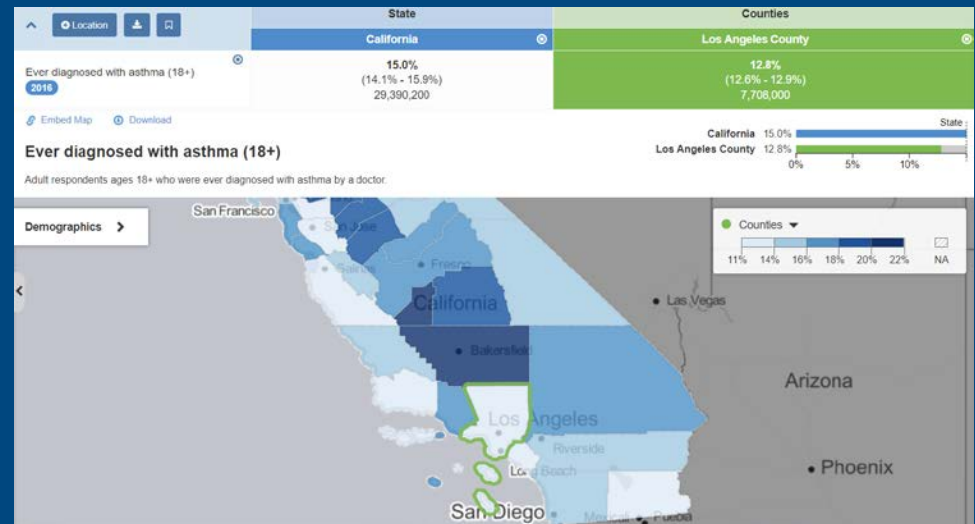

- CHIS is the largest state health survey in the nation
  - Web and telephone survey
  - Conducted annually
  - Questions on a wide range of health topics, including health insurance coverage, immigrant health, and chronic diseases
- Representative data on all 58 counties in California
  - More than 20,000 Californians surveyed each year
  - Includes adults, teenagers, and children
  - Participants chosen at random

# CHIS Data Diversity

- The CHIS sample is extensive enough to be statistically representative of California's diverse population
- CHIS is especially known for its hard-to-find data on ethnic subgroups and sexual minorities
  - Detailed picture of the health and health care needs of California's large and diverse population
  - CHIS sample includes people from many ethnic groups to provide health-related information for most large and small racial and ethnic populations that all are a part of California
  - CHIS is conducted in English, Spanish, Chinese, Korean, Tagalog, and Vietnamese

# CHIS Data Products

- 1-Year Public Use File (1-Yr PUF)
- 2-Year Public Use File (2-Yr PUF)
- AskCHIS ([ask.chis.ucla.edu](http://ask.chis.ucla.edu))
- AskCHIS Neighborhood Edition ([askchisne.ucla.edu](http://askchisne.ucla.edu))
- Data Access Center Projects
- Data Estimate Requests

# CHIS COVID Dashboards

- 2020 CHIS COVID-19 Preliminary Monthly Estimates
  - Data from new CHIS questions regarding COVID-19
- COVID-19 Rates and Risk Factors by CA County
  - COVID data presented alongside CHIS estimates for COVID-19 risk factors
- NHPI COVID-19 Data Policy Lab Dashboard
  - Presents state-level COVID-19 case and death rates for Native Hawaiian/Pacific Islanders in United States.
