California Moves on Bill to Curb Sprawl and Emissions

Goal: To align regional transportation, land use and affordable housing plans to reduce greenhouse gas emissions.
Cap-and-Trade Investments

CalEnviroScreen

A CalEPA model that combines economic data with information on pollution and other environmental impacts. It is used to identify "disadvantaged communities" which, under SB 535, will receive 25% of all non-utility cap and trade revenue.
“Cities should think like farmers, in revenue per acre.”
Vertically integrated, community-owned regional food system enterprise including farms, processing, wholesale distribution, and retail stores

Non-profit community-based land trust to acquire and steward critical foodshed assets

Non-profit community-based financial institution that aggregates and supplies capital and financial services to Food Commons
